

# Thursday CREATivE Talks

Dear colleagues,

We are pleased to invite you to take part in **the 2nd webinar of the Interreg CREATE project on the importance of adaptation planning for coastal areas, in relation to the impacts of climate change.**

The webinar is aimed at cities, municipalities, counties, development agencies, maritime and coastal economic operators, academic and civil society organisations, and the media.

Across coastal environments, the effects of climate change have already become reality. Whether it is floods from the sea or flash floods, forest fires, droughts or heat waves, the inhabitants of coastal areas and the blue economy are already endangered by the climate crisis.

What else awaits us and how the regions and cities are preparing for adaptation, you can find out on **Thursday, December 1, 2022, starting at 10 a.m.**

The webinar will be held via the ZOOM platform.

The speakers are **Daria Povh Škugor** and **Ivan Sekovski** from the UNEP MAP Centre for Priority Activities (PAP/RAC), along with **Mili Novak** from the Regional Development Agency of Split-Dalmatia County (RERA SD), **Roberto Montanari** from the Emilia Romagna region (Italy) and **Matea Dorčić**, head of the administrative department of Tourism and Maritime affairs of Split-Dalmatia County (Croatia), who will present the coastal planning experience of their regions and cities.

**The webinar will be held in Croatian and Italian, with simultaneous translation to Croatian, Italian and English.**

To join the webinar, please register [here](#).

We look forward to your participation!  
Best regards, PAP/RAC & CREATE project team

# Thursday CREATiVE Talks

## AGENDA

10:00 - 10:05

**Introducing Thursday CREATiVE Talks**, Ivan Sekovski, PAP/RAC

10:05 - 10:20

**Five lessons for a successful Coastal Plan**, Daria Povh Škugor, PAP/RAC

10:50 - 11:00

Q & A

## **ABOUT THE PROJECT**

'**CREATE** - Climate Responses for the AdriaTic REGION' Interreg IT-HR project is the result of cooperation between leading Croatian and Italian institutions and organizations in the field of climate research and activities along the Adriatic coast. By sharing know-how and experience to various target groups - from regional and local authorities, development agencies, academic and business communities, non-governmental organizations, to the general public, the project contributes to the establishment of appropriate measures to deal with current and expected climate changes in the Adriatic region.
